# The Problem You're Facing

You're losing leads, missing follow-ups, and spending hours on tasks that should be automatic. Sound familiar?

1

## Leads Slip Through the Cracks

Someone visits your website at 2 AM. By morning, they've already hired your competitor. No capture. No follow-up. No chance.

2

## Manual Everything

You're manually responding to inquiries, scheduling calls, sending quotes, and tracking jobs. It's exhausting and error-prone.

3

## Money Left on the Table

Without automated follow-ups, you're losing 40-60% of potential revenue. Every missed text is a missed sale.

4

## No Time to Grow

You're so busy running the day-to-day that you never get to work ON your business. Growth stalls. Burnout sets in.

## The SNUD OS Solution

We build your entire automation system — website, CRM, lead capture, follow-up sequences, scheduling, payments, and analytics — all deployed in as little as **48 hours**. You focus on your craft. We handle the tech.

# Your Client's Journey

Here's what happens when someone discovers your SNUD OS-powered business — step by step, fully automated.

## Step 1 — Someone Has a Problem

A potential client searches for your service online. They find your professional, branded website powered by SNUD OS — optimized for mobile, fast-loading, and built to convert.

## Step 2 — They Land on Your Website

Your site captures their attention instantly. Industry-specific design, clear calls-to-action, and an intelligent lead capture form that asks the right questions. They submit their info.

## Step 3 — You Get Notified Instantly

Within seconds, you receive a notification via email, text, AND your SNUD OS dashboard. The lead is automatically added to your CRM with all their details organized.

## Step 4 — Automated Follow-Up Fires

While you're busy, SNUD OS sends a personalized welcome text and email to the lead. Automated nurture sequences keep them engaged — no manual work needed.

## Step 5 — You Make the Call

Armed with the lead's info from your dashboard, you call at the perfect time. The lead is warm, already engaged, and ready to talk. Your close rate skyrockets.

## Step 6 — Seamless Payment & Booking

Send a professional invoice or payment link directly from your dashboard. Stripe-powered payments process instantly. Contract signed. Job booked. Money in the bank.

## Step 7 — Deliver & Delight

After the job, automated review requests go out. 5-star reviews start rolling in. Referral campaigns trigger automatically. Your reputation grows on autopilot.

## Step 8 — Repeat & Scale

Every client enters the cycle. Analytics show what's working. Your business grows while you sleep. That's the SNUD OS difference.

# Choose Your Package

Every package includes a fully branded website, CRM integration, automation pipelines, and dedicated support. Pick the tier that fits your business.
